

THE PROBLEM

3 AM. Your Cluster is on Fire.

What every platform team faces — and what NeuroScale Ops eliminates

MANUAL INCIDENT RESPONSE TODAY

- ❑ **100+ Prometheus alerts** fire simultaneously during an OOMKill cascade
- ❑ Engineer reads a **40-page runbook** at 3 AM to find the right `kubectl` command
- ❑ Wake someone to **approve the fix** — who is asleep in a different timezone
- ❑ Write the **post-mortem at 6 AM** from memory, exhausted, missing details
- ❑ No visibility on **financial impact** — cost of downtime calculated days later
