AI Triage in Action

Real Groq inference — structured JSON output — sub-second response

CRITICAL INCIDENT DETECTED

Stage 1 – Alert Detected

Alert ID	demo-oom-001
Type	OOMKILL
Severity	CRITICAL
Namespace	production
Resource	ml-inference-pod-7d9f8b
Message	Container 'inference-server' OOMKilled. Memory limit 512Mi exceeded. Restart count: 3

Querying Groq llama-3.3-70b-versatile...

Stage 2 – Groq AI Triage Complete

Root Cause	OOMKILL
Confidence	HIGH
Recommended Action	patch_resources
Runbook	RB-001
Human Approval	REQUIRED
AI Reasoning	The alert indicates that the container has been OOMKilled due to exceeding its memory limit, and the restart count is high, suggesting a recurring issue. Increasing the memory limit and request by 2x,

Stage 3 – OpenCost Financial Analysis

Namespace	production
Current Monthly Cost	\$148.09/mo
Budget Utilisation	18.5%
Remediation Cost Delta	+\$15.00/mo
Verdict	WITHIN_BUDGET
Recommendation	Namespace 'production' within budget (19% utilised). Action 'patch_resources' cost delta: \$+15.00/mo. Approved to proceed.

Stage 3 – Human Approval via UiPath Apps

UiPath Apps Form Presented to On-Call SRE

Root Cause:	OOMKILL	Confidence:	HIGH
Action:	patch_resources		
Cost Delta:	+\$15.00/mo		

✓ APPROVED by on-call SRE (simulated in demo)
