

AI-ASSISTED DEVELOPMENT

Built with Claude Code

3 documented AI-pair-programming sessions · transparent & reproducible development

SESSION 001 · JUNE 15 2026

Core Pipeline Architecture

Scaffolding the multi-agent system from scratch with safety-first design

- ✓ Agent interface design (DetectorAgent, TriageAgent, RemediationAgent)
- ✓ Groq LLM integration + fallback rule-based triage
- ✓ Async pipeline orchestration with structured logging
- ✓ Pydantic models for all inter-agent data contracts

```
$ DEMO_MODE=true python main.py
✓ DetectorAgent initialized
✓ TriageAgent ready (llama-3.3-70b)
... pipeline scaffolded
```

SESSION 002 · JUNE 16 2026

Safety Guardrails & Tests

Adding production-grade safety mechanisms and full test coverage

- ✓ MIN_SAFE_REPLICAS blast-radius guard implementation
- ✓ Per-action confidence threshold gates
- ✓ pytest suite: test_pipeline.py + test_safety.py (15 tests)
- ✓ Dry-run mode for safe pre-flight validation

```
$ pytest tests/ -v
✓ 15 passed in 2.14s
BlastRadiusGuard: ACTIVE
ConfidenceThreshold: ENFORCED
```
